Daniel’s Prophecy of the Seventy Weeks

24 Seventy weeks are decreed for your people and your holy city: to finish transgressions, to put an end to sin, and to atone for iniquity; to bring everlasting righteousness to seal both vision and prophet, and to anoint a most holy place.

25 Know therefore and understand: from the time that the word went out to restore and rebuild Jerusalem until the time of an anointed prince,

there shall be seven weeks; and for sixty-two weeks

[there will be seven weeks and sixty-two weeks;]

it shall be built again with streets and moat, but in troubled times.

26 After the sixty-two weeks, an anointed one shall be cut off and shall have nothing, and the troops of the prince who is to come shall destroy the city and the sanctuary. Its end shall come with a flood, and to the end there shall be war. Desolations are decreed.
27 He shall make a strong covenant with many for one week,

and for half of the week

[but in the middle of the week]

he shall make sacrifice and offering cease;

and in their place shall be an abomination that desolates,

[and on the wing of abominations will come one who makes desolate]

until the decreed end is poured out on the desolator.

(Bold print added to pinpoint important terms and translation differences. New American Standard Bible translation [NASB] is in brackets for the alternate translation of the previous line or lines which are in NRSV.)

The Harmonizing Views B and C indicate the sequence of events if there were two systems for calculating the beginning and end of the day: sunset to sunset for one (Judaeus, as determined by the Sadducees) and sunrise to sunrise for the other (Galilee). Harmonizing View C (HV C) would indicate the sequence of events had the Pharisees and the Sadducees determined the first day of the month differently. Harmonizing View A and the Sadducean dates in HV B and HV C are of the same time sequence without the Last Supper being indicated as an alternative Passover meal in HV B and C. This is because it is conjectured that Jesus would not have followed the Sadducean dating under HV B or C but the alternate Galilean or Pharisee datings. In these letter two the last supper is noted as an alternative Passover meal. Under these two possible scenarios (HV B and HV C) these alternative Passover meals would be officially tolerated as acceptable by the parties using them.

Possible candidates for a first anointed ruler appearing after the first 7 weeks

the Persian king, Cyrus (539);
Jeshua, the high priest (~537);
and Zerubbabel, the governor of Judah (~537).

Possible candidates sometimes claimed to be the anointed one who would be cut off after the 69th week

1) The high priest Onias III,
who very possibly was killed in 171 BCE.
(Josephus contests that he was murdered at this time.)

2) King Agrippa I, d. 44 CE.
This is the usual traditional Jewish candidate.

3) Alexander Yani, an evil high priest, 103–76 BCE
